EDUCATION

- | | |
|--|-----------------------|
| Shri Vishnu Engineering College for Women, Bhimavaram | <i>Expected: 2027</i> |
| <i>B.Tech in Computer Science and Engineering (Artificial Intelligence and Data Science)</i> | CGPA: 9.39 |
| Bharatiya Vidya Bhavans, CBSE | <i>2023</i> |
| <i>Senior Secondary (Class XII)</i> | Percentage: 85% |
| Bharatiya Vidya Bhavans, CBSE | <i>2021</i> |
| <i>Secondary (Class X)</i> | Percentage: 92% |

EXPERIENCE

Software Testing Intern – Qentelli May 2025 – Jul 2025

- Trained on AccelQ automation testing framework with focus on test case design, execution, and result analysis.
- Learned industry-standard QA workflows, defect life cycle, and software testing practices in a corporate environment.

PROJECTS

- | | |
|---|-----------------|
| Reward Recommendation System with Time-Aware Clustering and A/B Testing | <i>Jan 2026</i> |
| <i>Python, Pandas, NumPy, Scikit-learn, Clustering, Time-Series, Explainable AI, A/B Testing</i> | |
| <ul style="list-style-type: none">Built a personalized credit card reward recommendation system using K-Means clustering on category-wise spending behavior.Implemented time-aware customer segmentation with concept drift detection for dynamic monthly preference updates.Designed a cost-sensitive reward optimization model balancing customer satisfaction and bank incentive cost.Evaluated system using statistical A/B testing (paired t-test, Cohen's d), achieving significantly higher user utility at lower cost. | |
| Aadhaar Biometric Infrastructure Stress Analysis (BUIS-DSI) | <i>Jan 2026</i> |
| <i>Python, Pandas, NumPy, Time-Series Analysis, Data Visualization</i> | |
| <ul style="list-style-type: none">Developed and submitted this project for the UIDAI Data Hackathon 2026.Analyzed state and district-wise Aadhaar biometric update data to detect abnormal workload surges.Designed anomaly indices (BUIS and DSI) for early warning and hotspot identification.Performed spatio-temporal aggregation and visualized peak-stress regions using heatmaps and comparative plots. | |
| Timetable Management Dashboard | <i>Nov 2025</i> |
| <i>HTML, CSS, JavaScript, Node.js, Express</i> | |
| <ul style="list-style-type: none">Built a dashboard for managing departments, faculties, subjects, and timetables with full CRUD operations.Developed responsive UI and role-based admin features to add, edit, and delete academic data.Implemented secure RESTful APIs using Node.js and Express for efficient data handling. | |

SKILLS

- Programming Languages:** Python, C, JavaScript, HTML, CSS, SQL
- Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Tableau, Statistical Analysis
- Concepts & Fundamentals:** Machine Learning, Clustering, Time-Series Analysis, Statistical Testing, Data Structures and Algorithms (DSA)
- Soft Skills:** Teamwork, Adaptability, Communication

CERTIFICATIONS

- **NPTEL**: Software Testing
- **Deloitte**: Data Analytics Job Simulation
- **Trainity**: Data Analytics Live Project Submission
- **Infosys SpringBoard**: Programming in Java
- **ISRO**: Advances in Remote Sensing Techniques for Geological Applications Course completion

ACHIEVEMENTS

- Submitted a full project in the UIDAI Data Hackathon 2026 on spatio-temporal analysis of Aadhaar biometric infrastructure stress.
- Core Team Member for organizing the ACM-W technical event “*Visualize the Invisible – Where Algorithms Come Alive*”, focused on DSA visualization and student engagement.
- Developed a working prototype in the GDG Internal Hackathon (Google Solution Challenge).
- Built interactive dashboards using Tableau during the Deloitte Data Analytics Job Simulation.

POSITIONS OF RESPONSIBILITY

- Active Member – ACM (Association for Computing Machinery), College Chapter
