EDUCATION

B.Tech – CSE (Artificial Intelligence & Data Science) Shri Vishnu Engineering College for Women, Bhimavaram	CGPA: 9.39 / 10.0 Expected: 2027
Senior Secondary (Class XII) – CBSE Bharatiya Vidya Bhavans · Percentage: 85% · 2023	Secondary (Class X) – CBSE Bharatiya Vidya Bhavans · Percentage: 92% · 2021

EXPERIENCE

Software Testing Intern · Qentelli	May 2025 – Jul 2025
- Automated functional test cases using the AccelQ automation testing framework for web-based applications, improving release efficiency and reducing manual testing effort. - Designed and executed end-to-end test scenarios to validate core application workflows, identify edge cases, and ensure software reliability. - Collaborated with development teams following Agile methodology, gaining hands-on exposure to industry-standard QA processes and sprint-based delivery.	

PROJECTS

Aadhaar Biometric Infrastructure Stress Analysis UIDAI Hackathon 2026	2026
Python · Pandas · NumPy · Time-Series Analysis · Data Visualization · Matplotlib	
- Analyzed 1.8M+ Aadhaar biometric update records using Python and Pandas to identify spatio-temporal infrastructure stress patterns across states and districts. - Engineered custom metrics BUIS (Biometric Update Infrastructure Score) and DSI (District Stress Index) to detect and benchmark workload spikes via time-series analysis. - Delivered state-month heatmaps and district-level dashboards to provide actionable insights for early-warning systems and government resource planning.	
Timetable Management Dashboard Full-Stack Web Application	2025
HTML · CSS · JavaScript · Node.js · Express.js · MongoDB · REST APIs · JWT Authentication	
- Built a centralized academic timetable management system with JWT-based authentication and role-based access control for secure multi-user operations. - Engineered RESTful APIs and implemented complete CRUD operations using Express.js and MongoDB for scalable, efficient data management. - Implemented conflict-aware scheduling with real-time faculty collision validation to automatically detect and prevent timetable clashes.	

SKILLS

Programming Languages:	Python, C, SQL
Web Development:	HTML, CSS, JavaScript, Node.js, Express.js, REST APIs, CRUD Operations
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Tableau, Time-Series Analysis, Data Visualization
Concepts:	Machine Learning, Clustering, Data Structures and Algorithms (DSA)
Testing & Tools:	AccelQ, Automation Testing, Agile Methodology

ACHIEVEMENTS

UIDAI Data Hackathon 2026 – Submitted a full analytical project on spatio-temporal stress analysis of Aadhaar biometric infrastructure at a national level. ACM-W Core Team Member – Co-organized "Visualize the Invisible – Where Algorithms Come Alive", a technical event focused on DSA visualization and student engagement. GDG Internal Hackathon – Developed a working prototype for the Google Solution Challenge, demonstrating rapid prototyping and collaborative problem-solving. Deloitte Data Analytics Job Simulation – Built interactive Tableau dashboards applying industry-grade analytics practices to real-world business scenarios.
--

POSITIONS OF RESPONSIBILITY

Active Member – ACM (Association for Computing Machinery), College Chapter – Contributed to technical community building, event planning, and peer knowledge-sharing.
--
